

INVESTMENT OBJECTIVE

This portfolio aims to deliver above inflation growth in the value of the fund at retirement, whilst taking a level of risk consistent with a moderately cautious or balanced risk attitude over a long (>12.5 years) time period.

Your portfolio comes with ongoing governance. This simply means that our investment experts check it regularly. It allows us to maintain the best mix of assets in line with the risk category - and to make sure it is performing in line with its overall objectives - aiming to give you the best returns.

If our experts decide that the mix of assets needs to be adjusted, it happens automatically on your behalf, you don't need to do anything. What's more, this service comes at no extra cost.

Fund manager	Trevor Greetham, Royal London Asset Management (since Apr-15)
Launch date	12.01.09
AUM (£m)	9332.3
Annual management charge (AMC)	1.00%
Investment expenses	0.00%
Total expense ratio (TER)*	1.00%
Transaction Costs (2018)	0.152%

PORTFOLIO PERFORMANCE AGAINST BENCHMARK

The past 5 years:

Source: Lipper, Royal London, as at 31.08.19. All performance figures shown, including those shown for the growth in the benchmark, have been calculated net of a 1% Annual Management Charge. Past performance is not a guide to the future. Prices can fall as well as rise meaning you may not get back the full amount of capital originally invested. Investment returns may fluctuate and are not guaranteed.

PORTFOLIO MANAGEMENT

The portfolio is managed by the multi asset team at our sister asset management company Royal London Asset Management (RLAM), one of the UK's leading fund management companies. The multi asset team applies a systematic framework for allocating to various asset classes and regions, with investment decisions informed by a range of quantitative models.

“I believe multi asset investing can offer an attractive smoothing of returns in ever-changing market conditions. A robust tactical asset allocation process allows investors to exploit shorter-term opportunities and generate significant added value over time.”

Trevor Greetham, Head of Multi Asset, Royal London Asset Management

PORTFOLIO GOVERNANCE

Our Governed Portfolios have a formal review process and are monitored by the Investment Advisory Committee (IAC). The IAC consists of pension and investment experts and is headed up by an independent chairperson, to ensure that decisions remain impartial. The IAC meets regularly, usually on a quarterly basis, to review our full investment proposition. The IAC process is deliberately about taking a long-term view to ensure that investment decisions are based on sound fundamentals.

LAST 3 TACTICAL CHANGES:

15th August 2019

Global equities rose for the sixth month this year in July as the Federal Reserve cut US interest rates in response to slowing growth. While the US-China trade talks showed few signs of progress, investors remained hopeful of a resolution. Given muted inflation, we expect monetary easing by central banks to trigger a mini cyclical upswing. We have taken advantage of short-term market weakness to move more overweight in equities, increasing our underweight in commodities; and, as bond yields declined to new lows, have reduced our holdings of government and global high yield bonds.

11th July 2019

Stock markets rebounded in June as investor sentiment recovered due to the Federal Reserve signalling it would likely cut rates in July. Trade tensions also appeared to ease as there were positive signals about a US deal with China. Despite ongoing political uncertainty and slower global growth, risk of global recession in 2020 has arguably reduced as policymakers signalled easier policies. We have moved more overweight in equities. We have moved more overweight in equities and short duration global high yield bonds, and reduced our underweight in commodities, given upside risks to oil prices; reducing our overweight in conventional gilts.

13th June 2019

Global stock markets retrenched in May as President Trump reignited trade wars with China, having imposed tariffs on specific imports from China, and they retaliated; hopes of a US-China trade deal reduced. Economic data deteriorated slightly and antitrust scrutiny weighed on technology stocks. Central banks are concerned about trade tensions and are closer to cutting interest rates, which should boost investor sentiment. We have moved overweight in UK government bonds, given weaker inflation expectations, and retain a moderate overweight in equities, given positive global growth persisting; while reducing exposure to cash, and commodities which are sensitive to global trade slowing.

The allocations shown are derived by using the latest tactical allocation as at 15.08.2019 and latest fund holdings data as at 31.08.19. These figures should therefore not be relied upon as being exact. Negative allocations reflect the use of derivatives to decrease regional equity exposure. Allocations may not always total 100% due to rounding.

RISK FACTORS
